

ASSIGNMENT-8

The ionic application consists of two screens. It's an extension to lab-6 where we get details of a place from two different API's. The data is presented on the screen.

In the first screen, user is prompted to give in desired city name. The screen looks like.

Enter city name:

Kansas

Get Details

In the second screen, User is provided with the details fetched and presented on the screen. The screen looks like:

Name: Kansas

Description :broken clouds

Temperature is :274.71

Place ID for Kansas is: ChIJawF8cXEXo4cRXwk-S6m0wmg

Location: Kansas, USA

Latitude: 39.011902

longitude: -98.4842465
